

Nastavení Windows XP SP2 firewallu pro SQL Anywhere server

The image shows the Windows Firewall configuration process for SQL Anywhere server. It consists of three overlapping dialog boxes:

- Brána firewall systému Windows (Main Window):** Shows the 'Programy a služby' (Programs and Services) list. The 'Přidat port...' button is highlighted with a red circle.
- Přidat port (Top Dialog):** Shows the 'Přidat port' dialog. The 'Název' field is set to 'SQL Anywhere', the 'Číslo portu' is '2638', and 'TCP' is selected. The 'Změnit obor...' button is highlighted with a red circle.
- Přidat port (Bottom Dialog):** Shows the 'Přidat port' dialog. The 'Název' field is set to 'SQL Anywhere (UDP)', the 'Číslo portu' is '2638', and 'UDP' is selected. The 'Změnit obor...' button is highlighted with a red circle.
- Změnit obor (Bottom Dialog):** Shows the 'Změnit obor' dialog. The 'Pouze vnitřní síť (stejná podsíť)' radio button is selected and highlighted with a red circle.
